Understanding Peacekeeping

Third Edition

**PAUL D. WILLIAMS WITH
ALEX J. BELLAMY**

George Washington University; University of Queensland

"The perfect introduction to peacekeeping – complete with little-known facts, reliable statistics, insightful theories, provoking debates, and in-depth analyses. It will be incredibly useful to students and experienced researchers alike."

Séverine Autesserre, author of *Peaceland* and *The Frontlines of Peace*

Peace operations remain a principal tool for managing armed conflict and protecting civilians. The fully revised, expanded, and updated third edition of *Understanding Peacekeeping* provides a comprehensive and up-to-date introduction to the theory, history, and politics of peace operations.

Drawing on a dataset of nearly two hundred historical and contemporary missions, this book evaluates the changing characteristics of the contemporary international environment in which peace operations are deployed, the strategic purposes peace operations are intended to achieve, and the major challenges facing today's peacekeepers. All the chapters have been revised and updated and five new chapters have been added on stabilisation, force generation, use of force, organized crime, and exit strategies. The third edition of this popular text will be essential reading for students and scholars of peace and conflict studies, security studies, and international relations.

New!

New Pandemics, Old Politics

Two Hundred Years of War on Disease and its Alternatives

ALEX DE WAAL

World Peace Foundation

"In its scope, learning, and wisdom, New Pandemics, Old Politics is nothing less than stunning. As we try to understand the Covid-19 pandemic and prepare for pandemics yet to come, this deeply learned and compassionate book will remain indispensable."

Sulmaan Khan, Tufts University

"Brilliantly exposes a disordered and disrupted world 'de-prepared' for pandemics and pleads for change."

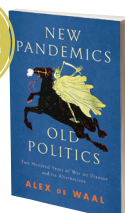

Heidi J. Larson, London School of Hygiene & Tropical Medicine

We know how a pandemic is supposed to end: we make sacrifices in our daily lives to support a 'war' on the pathogen, until medical science deploys a magic bullet to vanquish the invisible enemy. This is a comforting story, but it hasn't ever happened yet.

In *New Pandemics, Old Politics* Alex de Waal explores how the modern world adopted a martial script to deal with epidemic disease threats, and how this has failed—repeatedly. From cholera to influenza, AIDS to Covid-19 he explores the politics of pandemics and makes a powerful case for a new democratic public health for the Anthropocene.

Security and Public Health

Pandemics and Politics in the Contemporary World

SIMON RUSHTON

University of Sheffield

"Simon Rushton's deep engagement with the politics of public health gets to the very core of what it means to ensure health and human security for all."

Mely Caballero-Anthony, Nanyang Technological University, Singapore

In this book, Simon Rushton explores the politics of pandemics in the contemporary world. Arguing against a tendency to treat global health security as a technical challenge, the book stresses the need for a vibrant, and even confrontational, political engagement around the implications of securitizing public health.

Bitskrieg

The New Challenge of
Cyberwarfare

JOHN ARQUILLA

Naval Postgraduate School

*With a Foreword by Former Defense
Secretary Leon E. Panetta*

"Brilliant and intensely relevant."

Stan McChrystal, General, US Army (Retired)

*"Written by a true visionary, Bitskrieg is a call to arms to face the
changes reshaping our world and war itself."*

P.W. Singer, author of Ghostfleet

New technologies are changing how we protect our citizens and wage our wars. Among militaries, everything taken for granted about the ability to maneuver and fight is now undermined by vulnerability to "weapons of mass disruption": cutting-edge computer worms, viruses, and invasive robot networks. At home, billions of household appliances and other "smart" items that form the Internet of Things risk being overtaken, then added to the ranks of massive, malicious "zombie" armies.

In this new book, world-renowned cyber security expert John Arquilla looks unflinchingly at the challenges posed by cyberwarfare – which he argues have neither been met nor mastered. He offers fresh solutions for protecting against enemies that are often anonymous, unpredictable and capable of projecting force and influence vastly disproportionate to their size, strength or wealth. The changes called for require radical rethinking of military and security affairs, diplomacy, even the routines of our daily lives.

216 x 138mm | 216 pages | UK July 2021, US September 2021

HB | 978-1-5095-4362-5 | £50.00 | \$64.95 | €61.90

Information at War

Journalism, Disinformation,
and Modern Warfare

PHILIP SEIB

University of Southern California

*"Using exactly the right examples ranging from
Homer to modern China's 'Three Warfares',
Professor Seib takes us on convincing and
captivating analytic journey, proving again that he is today's
master at understanding how information shapes every part of
our lives."*

**Ambassador Marc Grossman, Former Under Secretary of
State for Political Affairs, U.S. State Department**

A war's outcome is determined by more than bullets and bombs. In our digital age, the proliferation of new media venues has magnified the importance of information – whether its content is true or purposely false – in battling an enemy and defending the public. In this book, Philip Seib, one of the world's leading experts on media and war, offers a probing analysis of the role of information in warfare from the Second World War to the present day and beyond. He focuses on some of the thorniest issues on the contemporary agenda: When untruthful and inflammatory information poisons a nation's political processes and weakens its social fabric, what kind of response is appropriate? How can media literacy help citizens defend themselves against information warfare? Should militaries place greater emphasis on crippling their adversaries with information rather than kinetic force?

Well-written and wide-ranging, *Information at War* suggests answers to key questions with which governments, journalists, and the public must grapple during the years ahead. Information at war affects us all, and this book shows us how.

The False Promise of Liberal Order

Nostalgia, Delusion and the Rise of Trump

PATRICK PORTER

University of Birmingham

*"The single best book on US foreign policy written from a non-interventionist perspective since Barry Posen's
Restraint."*

Colin Dueck, George Mason University

*"Extraordinary... not only an incisive critique of the failures of modern U.S. foreign policy, but a much-needed
dispelling of the central myth that 'foreign policy traditionalists' cling to."*

The American Conservative

*"No one can speak of the 'liberal international order' again without grappling with Porter's cutting analysis and lyrical reflection —
and, one hopes, heeding it."*

Stephen Wertheim, Quincy Institute for Responsible Statecraft

Urban Warfare in the Twenty-First Century

ANTHONY KING

Warwick University

"Likely to become the standard text on urban warfare in the twenty-first century... will be embraced by military practitioners, scholars, and government policy-makers but also deserves a wide readership among all those concerned with municipal security and the sociology of urban violence."

Michael Evans, Australian Defence College, Canberra

"Highly recommended for readers interested in the changing character of war in the 21st century."

Peter R. Mansoor, author of *Surge: My Journey with General David Petraeus and the Remaking of the Iraq War*

Over the last two decades, warfare has migrated into cities. From Mosul to Mumbai, Aleppo to Marawi, the major military battles of our time have taken place in densely populated urban areas. Why has this happened? What are the defining characteristics and the military and political implications of urban warfare today?

Leading sociologist Anthony King answers these critical questions through close analysis of recent urban battles and their historical antecedents. Exploring the changing typography and evolving tactics of the urban battlescape, he shows that whilst some methods used in urban battle are not new, operations in cities have become highly distinctive. Today, urban warfare has coalesced into gruelling micro-sieges, which extend from street level – and below – to the airspace high above the city – as combatants fight for individual buildings, streets, and districts. At the same time, digitalized social media and information networks have communicated these battles to global audiences across the urban archipelago, with these spectators often becoming active participants in the fight.

A timely reminder of the costs and the horror of war and violence in cities, this book offers an invaluable interdisciplinary introduction to urban warfare in the new millennium for students of international security, urban studies, and military science.

What's Wrong with NATO and How to Fix It

MARK WEBBER, JAMES SPERLING AND MARTIN A. SMITH

University of Birmingham; University of Akron; Royal Military Academy Sandhurst

"This valuable book offers many realistic and well-considered reforms aimed at making NATO fit for the twenty-first century. This makes it compulsory reading for anyone concerned about the fate of the transatlantic security relationship in our disorderly and increasingly confrontational world."

Jamie Shea, University of Exeter and former NATO Deputy Assistant Secretary General

"Like precision-guided weapons, the authors of this insightful and persuasively argued book home in on what ails NATO. The recommended fixes are far-reaching in their capacity to ameliorate these problems and to help the alliance successfully navigate the years ahead."

John Deni, US Army War College

NATO, the most successful alliance in history, is beset by unresolved tensions and divergent interests that are undermining its cohesion, credibility and capability.

In this new book, Mark Webber, James Sperling and Martin Smith explore four key post-Cold War developments that threaten NATO's survival: an overextended geostrategic reach and an unwieldy security policy portfolio; a failure to address capability short-falls and meet defense spending benchmarks; US weariness and European wariness that call NATO into question; and intra-alliance discord over Russia's place in the European security order and how to deal with Moscow's destabilisation of Georgia and Ukraine. The authors propose in response a range of policy options that could reinvigorate NATO, but conclude with a note of caution. Alliances come and go and most are cast into the dustbin of history. If NATO is to avoid this fate it must not only address the major problems that trouble it, but also get to grips with future challenges to alliance cohesion and credibility, from Brexit to the emerging contest with China.

Israel

ALAN DOWTY

University of Notre Dame

"A concise history of modern Israel, from the last decades of the 19th Century to the present. A very readable, highly recommended book."

Anita Shapira, Tel Aviv University

How did a community of a few thousand Jewish refugees become, in little over a century, a modern nation-state and homeland of half the world's Jews? Has modern Israel fulfilled the Zionist vision of becoming "a nation like other nations," or is it still, in Biblical terms, "a people that dwells alone"? Alan Dowty distils over half a century of study as an inside/outside analyst of Israel in tracing this remarkable story. It begins in the waning days of the Ottoman Empire and continues through harsh struggle and in deep-rooted conflict with another people that sees Israel/Palestine equally as their homeland. Immensely successful by most standards, Israel today remains a center of contention and is still torn between its hard-earned role as a "normal" nation and the call of its particularistic, and unique, Jewish history.

War and Conflict in the Middle East and North Africa

ARIEL I. AHRAH

Virginia Tech

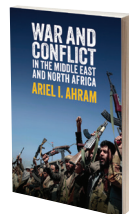

"Ariel Ahram has cleared the conceptual underbrush and introduced a number of important arguments about conflict in the Middle East. My students will be reading this book. If you want a clear-headed primer on the region's many wars, you should read it, too."

F. Gregory Gause, III, Texas A&M University

For much of the last half century, the Middle East and North Africa (MENA) has seemed the outlier in global peace. Today Iraq, Libya, Israel/Palestine, Yemen, and Syria are not just countries, but synonyms for prolonged and brutal wars. But why is MENA so exceptionally violent? More importantly, can it change?

Exploring the causes and consequences of wars and conflicts in this troubled region, Ariel Ahram helps readers answer these questions. *War and Conflict in the Middle East and North Africa* will be an essential resource for students of peace and security studies and MENA politics, and anyone wanting to move beyond headlines and soundbites to understand the historical and social roots of MENA's conflicts.

Syria

A Modern History

DAVID W. LESCH

Trinity University in San Antonio, Texas

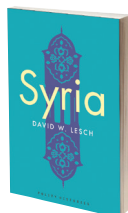

"An excellent and balanced analysis of Syrian contemporary history by top Syria expert David Lesch, enabling readers to access and understand the wide-ranging complexities of Syria today."

Nikolaos van Dam, author of *Destroying a Nation: The Civil War in Syria*

Today Syria is a country known for all the wrong reasons: civil war, vicious sectarianism, and major humanitarian crisis. But how did this once rich, multi-cultural society end up as the site of one of the twenty-first century's most devastating and brutal conflicts? David Lesch takes the reader on an illuminating journey through the last hundred years of Syrian history – from the end of the Ottoman Empire through to the current civil war. Only through understanding the complexities and challenges of Syria's history can this pivotal country in the Middle East begin to rebuild and heal.

Political Economies of the Middle East and North Africa

ROBERT SPRINGBORG

Naval Postgraduate School

"The state-of-the-art big picture analysis of where MENA is and how it got there."

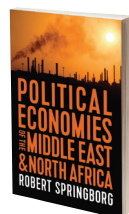

Glenn E. Robinson, Naval Postgraduate School

"A work of magisterial scope... brings the reader completely up-to-date on region's contemporary economic quandaries."

Eva Bellin, Brandeis University

Despite its oil wealth, the Middle East and North Africa is economically stagnating. In this book, leading Middle East scholar Robert Springborg discusses the economic future of this region by examining the national and regional political causes of its contemporary underperformance. Whether this economic inertia can be overcome or will continue into the indefinite future is a vital question that confronts both the region and the world.

The Stranger as My Guest

A Critical Anthropology of Hospitality

MICHEL AGIER

Translated by Helen Morrison

"Michel Agier has created a sensitive and innovative anthropology... he paves the way for a cosmopolitanism of the wandering humanity, our coming humanity."

Etienne Balibar, author of *Secularism and Cosmopolitanism*

The migration crisis of recent years has elicited a double response: on the one hand, many states have responded by tightening border controls, while on the other hand, many citizens have responded by welcoming new arrivals, offering them shelter, food and whatever help they can provide. In so doing, they have awakened an old form of anthropology that was long-thought dead – that of hospitality. Agier calls for a new hospitality policy for the modern era, one that will regard hospitality as a right rather than a favour and regard strangers as guests rather than treating them as aliens or enemies.

This timely and original book will be of great interest to students and scholars in anthropology and the social sciences generally, and to anyone concerned with migration and refugees in the world today.

Freedom of the Border

PAUL SCHEFFER

University of Tilburg

Translated by Liz Waters

"Paul Scheffer is one of Europe's most important thinkers... he recognises that embracing the benign necessity of borders is the best way of preventing them becoming walls and thus preserving our open societies."

David Goodhart, author of *The Road to Somewhere: The New Tribes Shaping British Politics*

There are few issues more contentious today than the nature and purpose of borders. Migration flows and the refugee crisis have propelled the issue of borders into the centre of political debate and revealed our moral unease more clearly than ever. Who are we to deny others access to our territory? Is not freedom of movement a basic human right, one that should be defended above all others?

Paul Scheffer takes a different view. Rather than thinking of borders as obstacles to freedom, he argues that borders make freedom possible. Democracy and redistributive justice are only possible with the regulation of access to territories and rights. Globalization is accompanied by growing inequality which fuels alienation and resentment. When liberals ignore that an open society needs borders, people with authoritarian inclinations will begin to erect them and will find popular support, as illustrated most vividly by Brexit and Trump. This timely and important book challenges conventional ways of thinking and will be of interest to everyone concerned with the great social and political issues of our time.

Bordering

NIRA YUVAL-DAVIS, GEORGIE WE-MYSS AND KATHRYN CASSIDY

University of East London; University of East London; Northumbria University

"A path-breaking study of borders and bordering processes that combines theoretical depth with empirical insight. Highly recommended."

Avtar Brah, Birkbeck, University of London

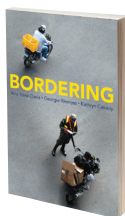

Controlling national borders has once again become a key concern of contemporary states and a highly contentious issue in social and political life, but is about much more than patrolling territorial boundaries at the edges of states. This book is a richly documented account, based on original research, of how bordering has become dispersed – taking place at different levels, in workplaces, in hospitals, and in schools – into the interstices of everyday life.

229 x 152mm | 240 pages | 2019

The Scramble for Europe

Young Africa on its way to the Old Continent

STEPHEN SMITH

Duke University

Today, 510 million people live inside EU borders, and 1.25 billion people in Africa. In 2050, 450 million Europeans will face 2.5 billion Africans – five times their number. The scramble for Europe will become as inexorable as the 'scramble for Africa' was at the end of the nineteenth century. Seeking to address how Europe will cope with this massive influx, Smith argues for a path between the two extremes of today's debate, advocating migratory policies that strike a balance between compassion and the interests of European nations.

Wandering Souls

TOBIE NATHAN

University Paris-VIII

Translated by Stephen Muecke

"Wandering Souls is uplifting and insightful, inviting readers to overcome natural reactions of fear, rejection and intellectual paralysis in the face of young people attracted to radical Islam... a deeply moving book."

Catherine Grandsard, University of Paris 8 Saint-Denis

In September 2014, the French government entrusted Tobie Nathan with the task of counselling radicalized young people who had been drawn to jihadism. In this book he recounts his experiences, and shows that the history of radicalizations is not the history of 'natures', but of metamorphoses.

216 x 138mm | 160 pages | 2019

Resident Foreigners

A Philosophy of Migration

DONATELLA DI CESARE

Sapienza University of Rome

Translated by David Broder

"Deeply original, thoughtful and based on an incredible erudition, Donatella Di Cesare's plea for a world in which all human beings would be 'resident foreigners' is the best answer to the rise of racism, xenophobia and nationalism."

Enzo Traverso, Cornell University

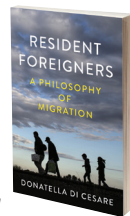

From the shores of Europe to the Mexican-US border, mass migration is one of the most pressing issues we face today, yet calls to defend national sovereignty are becoming ever more vitriolic. In this book, Donatella Di Cesare challenges the idea of the exclusionary state, arguing that migration is a fundamental human right. She develops an original philosophy of migration that places the migrants themselves, rather than states and their borders, at the centre. Through an analysis of three historic cities, Athens, Rome and Jerusalem, Di Cesare shows how we should conceive of migrants not as an other but rather as resident foreigners. Citizenship must be disconnected from the possession of territory altogether and founded on the principle of cohabitation – and on the ultimate reality that we are all temporary guests and tenants of the earth.

Along the Trenches

A Journey through Eastern Europe to Isfahan

NAVID KERMANI

Translated by Tony Crawford

"A breath-taking travel diary and a passionate plea for the diversity of cultures, for Europe and the beauty of stories."

Bayrischer Rundfunk

Between Germany and Russia is a region strewn with monuments to the horrors of war, genocide and disaster. In September 2016, German-Iranian writer Navid Kermani set out to travel along the trenches that are now re-emerging in Europe, from his home in Cologne to the Caucasus and to Isfahan, the home of his parents.

Cybersecurity

Politics, Governance and
Conflict in Cyberspace

**DAMIAN VAN PUYVELDE AND
AARON BRANTLY**

University of Glasgow; Virginia Tech

"Cybersecurity is an impressive and comprehensive volume of original insights that will become a guiding resource in the field. There is no better text for those starting out in the field or those looking for a refresher."

**Brandon Valeriano, Bren Chair of Armed Politics at the
Marine Corps University**

"Finally a book that brings order to cyberchaos in a systematic and informative way. Van Puyvelde and Brantly's dual focus on technology and politics shows how these two driving forces shape contemporary cybersecurity."

Myriam Dunn Cavelty, ETH Zurich

In this comprehensive text, Damien Van Puyvelde and Aaron Brantly provide a cutting-edge introduction to the key concepts, controversies and policy debates in cybersecurity. Structured around ten chapters, the book explores the complexities and challenges of cybersecurity using case studies – from the Morris Worm and Titan Rain to Black Energy. With questions for group discussion and suggestions for further reading throughout, this book is for anyone interested in understanding the challenges and opportunities presented by the continued expansion of cyberspace.

Augmented Reality

Unboxing Tech's Next
Big Thing

MARK PESCE

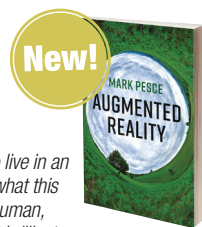

"This is the story of how we came to live in an increasingly augmented reality and what this might mean for the future of being human, told by one of this technology's most brilliant and playful pioneers. Thrilling, scary, hopeful, and required reading."

Douglas Rushkoff, author of *Present Shock: When Everything Happens* and *Team Human*

Slated as 'the next big thing in tech', augmented reality (AR) promises to take the screen out of our hands and wrap it around the world via 'smart spectacles'. As a pervasive, invisible interface between the world and our senses, AR offers unparalleled capacity to reveal hidden digital depths, but it also comes at a cost to our privacy, our property, and our reality.

In this crucial and provocative book, Mark Pesce draws on over thirty years' experience to offer the first mainstream exploration of augmented reality. He discusses the exciting and beneficial features of AR as well as the issues and risks raised by this still-emerging technology – a technology that moulds us by shaping what we see and hear. *Augmented Reality* is essential reading for anyone interested in the growing influence of this impressive but deeply concerning technology. As the book reveals, reality – once augmented – will never be the same.

SHAUN RIORDAN

Netherlands Institute for International Relations

"An indispensable survival guide to the next frontier for diplomacy. Riordan has issued a vital wake-up call about the perils that lie ahead if we do not marshal a collective response to the potential anarchic battle for cyber territory."

Tom Fletcher CMG, Professor, former ambassador, and bestselling author of *The Naked Diplomat*

This provocative book argues for the importance of cyberdiplomacy as an effective means of addressing the challenges generated by cyberspace. Using the vital tools offered by cyberdiplomacy we can reduce the escalation and proliferation of cyber conflicts by proactively promoting negotiation and collaboration online.

Russia and America

The Asymmetric Rivalry

ANDREI P. TSYGANKOV

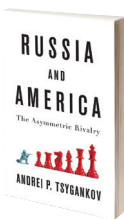

San Francisco State University

"In this compelling book, Andrei Tsygankov captures the full spectrum of Russia-US relations in all their complexity."

Fyodor Lukyanov, Editor-in-Chief of Russia in Global Affairs

With US-Russia relations at an 'all time low' are we entering a new era of Cold War? No, explains Andrei Tsygankov in this penetrating analysis. Russia is simply exploiting its asymmetric capabilities and alliances to defend and promote its interests, and to avoid yielding to pressure from a US struggling to maintain its global dominance.

Russia's Futures

RICHARD SAKWA

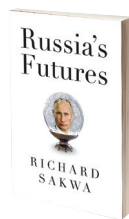

The University of Kent at Canterbury

"An original and deeply knowledgeable take on Russia today from the UK's leading expert on Russian politics."

Edwin Bacon, University of Lincoln

Russia is back as a major force in global politics, but what does this mean? In this erudite and balanced study, renowned Russia scholar Richard Sakwa explores the current debates on Russia, placing them into historical context and outlining the fundamental challenges currently facing the country..

Dealing with the Russians

ANDREW MONAGHAN

University of Oxford

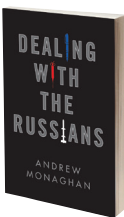

"A brilliant and hugely enjoyable book. Cogent, well researched and cleverly argued, Monaghan's illuminating analysis serves as a timely reminder of the dangers of misunderstanding Russia and an 'antidote' to Russian stereotypes that prevail in the West."

Nazrin Mehdiyeva, St Antony's College, Oxford

"refreshingly concise"
The Spectator

How to handle Russia? This question has become ever more prominent as the Euro-Atlantic community's relations with Russia languish in deep in systemic crisis, with dialogue suspended, reciprocal sanctions in place and proxy wars raging. In this book, Andrew Monaghan sets out a strategy to accommodate the many complex challenges at stake.

Russia

DMITRI TREININ

Carnegie Moscow Center

"Trenin's succinct, balanced, and thoughtful book is a valuable guide to modern Russian history as seen from the other side."

Sir Rodric Braithwaite, former British ambassador in Moscow and author of Armageddon & Paranoia: The Nuclear Confrontation

"A brilliant, concise interpretation of 120 years of Russian history, plus an insightful look at the future. Essential reading for all concerned about the dangerous – and unnecessary – revival of Cold War tensions."

Jack Matlock, former US ambassador and author of Reagan and Gorbachev: How the Cold War Ended

Leading Russia scholar Dmitri Trenin accompanies readers on Russia's rollercoaster journey from revolution to post-war devastation, perestroika to Putin's stabilization of post-Communist Russia. Explaining the causes and the meaning of the numerous twists and turns in contemporary Russian history, he offers a vivid insider's view of a country through one of its most trying and often tragic periods. Today, he cautions, Russia stands at a turning point – politically, economically and socially – its situation strikingly reminiscent of the Russian Empire in its final years. For the Russian Federation to avoid a similar demise, it must learn the lessons of its own history.

The Silk Road Trap

How China's Trade Ambitions Challenge Europe

JONATHAN HOLSLAG

Vrije Universiteit Brussel

"Jonathan Holslag awakens Europe to its romantic self-deception regarding China's expansionist intentions and offensives. Europe must get realistic about China and this book may just be that wake-up call."

Karel de Gucht, Vrije Universiteit Brussel and former EU trade commissioner

"A smart and provocative analysis that deserves wide attention."

François Godement, European Council on Foreign Relations

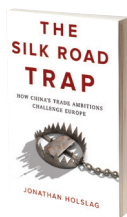

In the last ten years, unbalanced trade with China has cost Europe over 1.4 trillion euros. China's monumental infrastructural project, the New Silk Road, is set to make this situation even worse. Jonathan Holslag argues that Europe must reduce its reliance on China and work on building a stronger and more sustainable European economic model.

The Rise of the Civilizational State

CHRISTOPHER COKER

London School of Economics and Political Science

"Brilliantly written and shines an impressive and illuminating light on one of the most pressing issues of our day: What is the future of civilization (and, indeed, of civilizations) in the world of today and tomorrow?"

Nick Rengger, St Andrew's University

Christopher Coker looks in-depth at the rise of a new political entity, the civilizational state, and the two countries that now claim this title: Xi's China and Putin's Russia. Whilst civilizations themselves may not clash, civilizational states will challenge the rules of the international order that the West takes for granted.

The Future of British Foreign Policy

Security and Diplomacy in a World after Brexit

CHRISTOPHER HILL

Johns Hopkins University and Cambridge University

"The UK's departure from the European Union represents the most significant challenge to UK foreign policy since the Second World War period. Hill, one of the most astute observers of the UK's foreign policy, sets out the future challenges faced by Britain in managing its position as a European power outside the EU. Drawing on decades of scholarship, Hill offers a wealth of insight into the possibilities in the shadows of Brexit."

Richard Whitman, University of Kent

In this incisive book, Christopher Hill, a leading expert on both UK foreign policy and Europe's external relations, explores what lies ahead for British foreign policy in the shadows of Brexit.

Terrorism

A History

Second Edition

RANDALL D. LAW

Birmingham-Southern College

"Exceptionally rich and sophisticated in analysis... a welcome addition to the currently available literature and deserves to be read not only by students and academic specialists but also by security analysts, policymakers, and general readers."

Professor George Kassimeris, University of Wolverhampton

"A vital addition to any serious terrorism collection. From the first-century Sicarii to the jihadist groups of the present day, the volume addresses the dearth of studies on the history of terrorism. Terrorism: A History is highly recommended."

Jeffrey Kaplan, University of Wisconsin

Combatting Modern Slavery

Why Labour Governance is Failing and What We Can Do About It

GENEVIEVE LEBARON

University of Sheffield

"A bold, deeply-empirical, even heroic work of moral social science by a brilliant and intrepid scholar."

David W. Blight, Yale University and author of the Pulitzer prize-winning *Frederick Douglass: Prophet of Freedom*

"LeBaron's book gives renewed focus to what business actors, civil society, and government need to do to in order to combat modern slavery. It is a highly recommended read for all those involved in the challenges of eradicating slavery."

Urmila Bhoola, Former UN Special Rapporteur on contemporary forms of slavery

Over the last decade, the world's largest corporations – from The Coca Cola Company to Amazon, Apple to Unilever – have taken up the cause of combatting modern slavery. Yet, by most measures, severe labour exploitation continues to soar. Corporate social responsibility is not working. In this landmark book, Genevieve LeBaron lifts the lid on why.

Human Trafficking

Trade for sex, labor, and organs

BANDANA PURKAYASTHA AND FARHAN NAVID YOUSAF

University of Connecticut; International Islamic University

"A major contribution to research and policy making on human trafficking."

Yak n Ertürk, Middle East Technical University, Turkey, and former UN Special Rapporteur on Violence Against Women

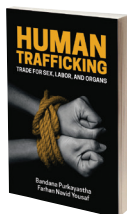

Drawing upon feminist and human rights approaches to trafficking, this book links the worlds of policy, protocols, and social structures with the lived experience and conditions of trafficked people. Only then can we understand what makes people vulnerable to trafficking, and the progress – as well as gaps – in initiatives seeking to address it.

Rethinking Global Governance

THOMAS G. WEISS AND RORDEN WILKINSON

The City University of New York; University of Sussex

"A must-read for students, scholars, and policy-makers interested in the future of our planet and how we govern it."

Adekeye Adebajo, University of Johannesburg

Once celebrated as an answer to the myriad ills of the post-Cold War era, global governance is now in trouble. Written by two of the leading scholars in the field, *Rethinking Global Governance* provides an antidote to simplistic usage and an authoritative yet readable attempt to grasp the governance of our globe—past, present, and future.

The Responsibility to Protect

From Promise to Practice

ALEX J. BELLAMY AND EDWARD C. LUCK

University of Queensland; Columbia University

"... Professor Luck, as my Special Adviser, was the architect of my three-pillar strategy for prevention and protection. I know that there is nothing easy about trying to protect populations and prevent atrocity crimes, but I also know from experience that it can and must be done. With vivid prose and the keen insight of practitioners, Professors Bellamy and Luck tell us how. Every official, advocate, humanitarian, analyst, scholar, and student should read this timely and masterly account. It points the way to a more secure and humane future."

H. E. Ban Ki-moon, Secretary-General of the United Nations, 2007-2016

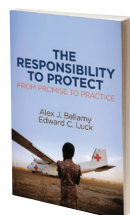

Why is there a gap between the world's normative pledges to prevent mass atrocities and its ability to make it a daily lived reality? Alex Bellamy and Edward Luck offer a probing and in-depth response to this fundamental question, calling for a more comprehensive approach to the practice of the 'Responsibility to Protect.'

How Should Democracies Fight Terrorism?

PATTI TAMARA LENARD

University of Ottawa

"Well researched, precisely written, extremely thoughtful, and compelling, this is an outstanding book."

James Pattison, University of Manchester

In the wake of major terrorist attacks, calls for ever more draconian policies to prevent further outrages are common. Such responses raise the pressing question: is it possible to effectively fight terrorism while respecting democratic values of equality and trust?

Examining recent examples of terrorist atrocities – including the murder of Muslims in New Zealand and Jews in Pittsburgh – Patti Tamara Lenard considers how democracies should tackle terrorism within the constraints imposed by democratic principles. Critiquing existing policies, from exile to racial profiling, she outlines what ethical counter-terrorism policies should look like, arguing for strategies that respect equality and maintain trust among diverse communities in democratic states. This erudite book is essential reading for any student or scholar of public affairs, security, counter-terrorism, and democratic governance.

War and Political Theory

BRIAN OREND

University of Waterloo

"An essential work that brilliantly elucidates the core principles shaping our understanding of the ethics and politics of conflicts. With keen theoretical analysis and vivid examples, Orend unpacks the most complex issues in present and future warfare."

Shannon E. French, Case Western Reserve University

In a world that continues to be riven by armed conflict, the fundamental moral and political questions raised by warfare are as important as ever. Under what circumstances are we justified in going to war? Can conflicts be waged in a "moral" way? This book is an engaging and up-to-date examination of these questions and more, penned by the foremost expert in the field. Using many historical and contemporary cases, it examines all the core disputes and doctrines, ranging from realism to pacifism, from just war theory to the democratic peace thesis. Its scope stretches from the primordial causes and perennial drivers of war to the cyber-centric future of armed conflict in the twenty-first century.

Violence and Political Theory

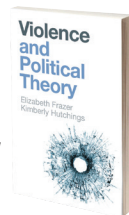

ELIZABETH FRAZER AND

KIMBERLY HUTCHINGS

University of Oxford; Queen Mary, University of London

"Lucid and engaging, this erudite book guides the reader through an extremely complex landscape, covering a tremendous range of sources. It is outstanding."

Christopher Finlay, University of Durham

Is politics necessarily violent? Does the justifiability of violence depend on whether it is perpetrated to defend or uphold the existing order – or perhaps on the way in which it is conducted? Is violence simply direct physical harm, or can it also be structural, symbolic, or epistemic?

Elizabeth Frazer and Kimberly Hutchings explore how political theorists, from Niccolò Machiavelli to Elaine Scarry, have addressed these issues. They engage with both defenders and critics of violence in politics, analysing their diverse justificatory and rhetorical strategies in order to draw out the enduring themes of these debates. This book will be an invaluable resource for students and scholars in areas ranging from the ethics of terror and war to radical and revolutionary political thought.

Transitional Justice

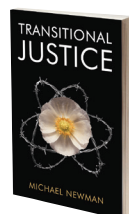

Contending with the Past

MICHAEL NEWMAN

London Metropolitan University

"This book masterfully contextualises the dizzying array of theoretical work in transitional justice while doing full service to disagreements. Reflective, critical and persuasive, it is ideal for undergraduate and postgraduate study."

Padraig McAuliffe, University of Liverpool

In this book, Michael Newman concisely and accessibly introduces the central debates of transitional justice, outlining the key ideas and giving an overview of the vast literature by reference to a range of examples and case studies. A readable overview for those coming to the subject of transitional justice for the first time, and food for thought for those already familiar with it, this book is invaluable in areas ranging from politics and international relations to peace and conflict studies, law, human rights and philosophy.

environmental studies and food

Geoengineering

The Gamble

GERNOT WAGNER

NYU

"An accessible and to-the-point introduction to the potential—and peril—of solar geoengineering. Wagner is unafraid to confront head-on the governance challenges of this gamble, one that humanity may have to take to prevent dangerous climate change."

Jesse Reynolds, author of *The Governance of Solar Geoengineering: Managing Climate Change in the Anthropocene*

Stabilizing the world's climates means cutting carbon dioxide pollution. There's no way around it. But what if that's not enough? What if it's so late in the game that even cutting carbon emissions to zero, tomorrow, wouldn't do?

Enter solar geoengineering. The principle is simple: attempt to cool Earth by reflecting more sunlight back into space. The primary mechanism, shooting particles into the upper atmosphere, implies more pollution, not less. If that doesn't sound scary, it should. There are lots of risks, unknowns, and unknowables.

As the founding executive director of Harvard's Solar Geoengineering Research Program, Wagner offers an inside view of the research already under way, and the actions the world must take to guide it in a productive direction. He lays out realistic scenarios of a geoengineered future and the pathways available to steer the world toward a balanced climate policy portfolio. Despite the risks, he argues, geoengineering may only be a matter of time. Not if, but when.

Is AI Good for the Planet?

BENEDETTA BREVINI

University of Sydney

Artificial intelligence (AI) is presented as a solution to the greatest challenges of our time: from global pandemics and chronic diseases to cyber security threats and, of course, the climate crisis. Despite being heralded as a solution to these problems, AI is actually exacerbating the climate crisis: running on technology, machines and infrastructures that deplete scarce resources in their production, consumption and disposal; and relying on data centres that demand excessive energy use to compute, analyse and categorize. Collectively, these processes involve extensive energy consumption and the burning of fossil fuels that make the climate crisis worse.

Is AI Good for the Planet? exposes the environmental costs of AI and examines its uneasy relationship with the climate emergency. Powerfully written, this book reveals how we should no longer ignore the environmental problems generated by AI. Instead, embracing a green agenda for AI that puts the climate emergency at centre stage is our urgent priority.

Written in a clear and accessible style, and underscored by research and wide-ranging international examples, this book is essential reading for scholars and students of artificial intelligence, environmental studies, politics, and media studies, as well as general readers interested in the connections between technology and the environment.

The Anthropocene

A Multidisciplinary Approach

JULIA ADENEY THOMAS, MARK WILLIAMS AND JAN ZALASIEWICZ

University of Notre Dame; University of Leicester; University of Leicester

"An accessible tour de force and an ideal starting point for anyone seeking an understanding of the Anthropocene predicament."

John R. McNeill, Georgetown University

We need to learn how to co-exist sustainably with the rest of nature in what is emerging as a new planetary state; the Anthropocene. This book adopts a multidisciplinary approach to the Anthropocene, spanning the geosciences, humanities and social sciences to investigate the varieties and complexity of the human activity driving global change.

Food

Third Edition

JENNIFER CLAPP

University of Waterloo

"A true classic, Food is breath-taking in its scope and insight. In bringing this brilliant work up to the moment, Clapp demystifies the global food economy so we can all realize our power to transform it."

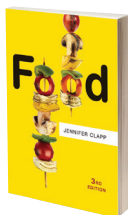

Frances Moore Lappé, author of *Diet for a Small Planet* and co-author of *World Hunger: 10 Myths*

We all need food to survive, and forty percent of the world's population relies on agriculture for their livelihood. Yet control over food is concentrated in relatively few hands.

The fully revised and expanded third edition of this popular book explores how the rise of industrial agriculture, corporate control, inequitable agricultural trade rules, and the financialization of food have each enabled powerful actors to gain fundamental influence over the practices that dominate the world food economy and result in uneven consequences for both people and planet. A variety of movements have emerged that are making important progress in establishing alternative food systems, but, as Clapp's penetrating analysis ably shows, significant challenges remain.

Global Energy Politics

**THIJS VAN DE GRAAF AND
BENJAMIN K. SOVACOO**

Ghent University; University of Sussex

"A comprehensive, well-researched, and valuable guide to the energy challenges of our time."

Robert O. Keohane, Princeton University

In this cutting-edge introduction, Van De Graaf and Sovacool uncover the intricate ways in which our energy systems have shaped global outcomes in four key areas of world politics: security, the economy, the environment and global justice. It will be an essential resource for students grappling with the major energy issues of our times.

Natural Gas

**MICHAEL BRADSHAW AND
TIM BOERSMA**

Warwick Business School; SIPA Center on Global Energy Policy, Columbia University

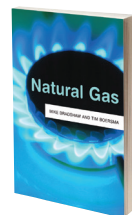

"Natural Gas will make you think differently about supplying energy markets whilst preserving the sustainability of our planet. It masterfully captures the essence of the natural gas revolution and its critical role in energy security, economic development and environmental stewardship."

Meg Gentle, President and CEO of Tellurian Inc.

Is natural gas the 'bridge' to our low carbon future? If it replaces coal in the power industry and develops as an alternative transportation fuel, natural gas has the potential to play a greater role in the current low carbon energy transition. But such a future for natural gas is by no means certain. In this timely book, Michael Bradshaw and Tim Boersma offer a sober and balanced assessment of a global gas industry whose fortunes hang in the balance.

Gold

**MICHAEL JOHN BLOOMFIELD AND
ROY MACONACHIE**

University of Bath; University of Bath

"Readable, accessible and brimming with insights that keep readers on their toes, the book will be immensely useful for students, teachers and general interest readers alike."

Anthony Bebbington, Clark University

Gold remains a highly prized resource within the global economy. From the insatiable demand for gold for electronics, to the environmental desolation driven by gold mining in the Amazon, the gold trade continues to touch the lives of people across the world. This book traces the seismic shifts in the industry over the last few decades. Huge purchases of gold reserves by BRICS countries like China and Russia mark the shifting balance of power away from the West, while growing demand for gold jewellery stems from growing affluence in new centres of power. Throughout, the authors argue for ways to improve practices for the countless workers who too often suffer at the producer-end of the supply chain. This book offers a probing analysis that reveals who wins and who loses, and what this means for the future of gold.

intelligence and surveillance

The Culture of Surveillance

Watching as a Way of Life

DAVID LYON

Queen's University

"A timely exposition of the surveillance imaginaries which run through the contemporary digital realm. Students, scholars, activists and the interested lay reader will find inspiration within its pages."

Kirstie Ball, University of St Andrews

"Holds up a mirror to our rapidly developing surveillance society. Surveillance culture provides plenty of reasons for concern, but also, as he usefully argues, a possible resource for hope."

Mark Andrejevic, Pomona College

Surveillance is not only 'done to us' – it is something we do in everyday life. Lyon reveals how the culture of surveillance may help to domesticate and naturalize surveillance of unwelcome kinds, weighing which kinds of surveillance might be fostered for the common good and human flourishing.

Intelligence in an Insecure World

Third Edition

PETER GILL AND MARK PHYTHIAN

University of Leicester; University of Leicester

"This excellent survey by two leaders in the field is essential reading."

Richard J. Aldrich, University of Warwick

In this third edition of their classic guide to the field, Gill and Phythian set out a comprehensive framework for the study of intelligence, discussing how states organise the collection, analysis and dissemination of intelligence, how it is acted upon, why it may fail and how the process should be governed in order to uphold democratic rights.

Intelligence in an Insecure World is an authoritative and accessible guide to a rapidly expanding area of inquiry – one which everyone has an interest in understanding.

The Future of Intelligence

MARK M. LOWENTHAL

Johns Hopkins University

"Even as a former director of CIA, I rely on Mark Lowenthal's work as the textbook in my intelligence class. With appropriate humility, The Future of Intelligence deftly outlines the likely course of our still critical intelligence enterprise."

Gen. Michael V. Hayden, USAF (ret.), former Director of the NSA and CIA

In this compelling book, leading intelligence scholar Mark Lowenthal explores the future of intelligence, arguing that the only certainty is that intelligence will remain an essential feature of statecraft in our increasingly dangerous world.

National Security Intelligence

Second Edition

LOCH K. JOHNSON

University of Georgia

"An excellent, compact, and readable introduction that makes the principal aspects of intelligence refreshingly intelligible to all."

Richard K. Betts, Columbia University and author of *Enemies of Intelligence*

National security intelligence is a vast, complex, and important topic, made doubly hard for citizens to understand because of the thick veils of secrecy that surround it. The second edition of this definitive primer guides readers skilfully through the shadowy world of US national security intelligence. Fully revised and updated, it explores the primary missions of intelligence whilst also analysing the wider dilemmas posed by the existence of secret government organizations in open, democratic societies.

conflict resolution and peacebuilding

International Conflict Management

J. MICHAEL GREIG, ANDREW P. OWSIAK AND PAUL F. DIEHL

University of North Texas; University of Georgia; University of Texas at Dallas

"This impressively comprehensive volume views conflict management in its broadest form. An ideal course text."

Patrick Regan, University of Notre Dame

International conflict has long plagued the world, and it continues to do so. With many interstate and civil disputes experiencing no third-party attempts at conflict management, how can the international community mitigate the effects of and, ultimately, end such violence? Why, in so many cases, are early, 'golden opportunities' for conflict management missed? This comprehensive text introduces the varied approaches and factors that promote the de-escalation and the peaceful management of conflict across the globe – from negotiation to arbitration, adjudication to peace ops, sanctions, and military or humanitarian intervention.

International Conflict Management will be essential reading for scholars and students of international peace and security studies, as well as practitioners working with governments, international organizations, non-profits, and post-conflict societies.

246 x 171mm | 256 pages | 2019

Contemporary Conflict Resolution

Fourth Edition

**OLIVER RAMSBOTHAM,
TOM WOODHOUSE AND HUGH MIALI**

University of Bradford; University of
Bradford; University of Kent

*"The most comprehensive, well-conceptualized
and useful introductory text to the wider fields of peace and
conflict studies."*

**John Paul Lederach, University of Notre Dame and Senior
Advisor for Humanity United**

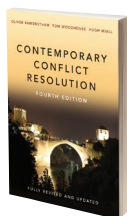

The fourth edition of this hugely popular text explains the key concepts, charts the development of the field, evaluates successes and failures, and assesses the main contemporary challenges. Comprehensively updated, the book identifies a new pattern of 'transnational conflicts' and argues for a response based on cosmopolitan conflict resolution.

246 x 171mm | 632 pages | 2016

The Contemporary Conflict Resolution Reader

**EDITED BY TOM WOODHOUSE,
HUGH MIALI,
OLIVER RAMSBOTHAM AND
CHRISTOPHER MITCHELL**

University of Bradford; University of Kent;
University of Bradford; George Mason University

*"An absolute must-have resource for anyone interested in the
birth and history of conflict resolution."*

Mari Fitzduff, Brandeis University

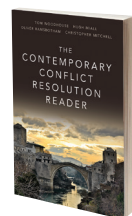

Drawing on their extensive experience and knowledge of conflict and peace research across the world, the editors have selected a rich and illuminating set of readings that offer a unique and accessible overview of the many different aspects of conflict resolution.

The World According to China

ELIZABETH C. ECONOMY

Council on Foreign Relations

"Explains why a more assertive and powerful China will raise questions that the West must urgently answer. Essential reading for all those who need to understand today's China."

Rana Mitter, University of Oxford

An economic and military superpower with 20 percent of the world's population, China has the wherewithal to transform the international system. Xi Jinping's bold calls for China to "lead in the reform of the global governance system," suggest that he has just such an ambition. But how does he plan to realize it? And what does it mean for the rest of the world?

In this compelling book, Elizabeth Economy reveals China's ambitious new strategy to reclaim the country's past glory and reshape the geostrategic landscape in dramatic new ways. Xi's vision is one of Chinese centrality on the global stage, in which the mainland has realized its sovereignty claims over Hong Kong, Taiwan, and the South China sea, deepened its global political, economic, and security reach through its grand scale Belt and Road Initiative, and used its leadership in the United Nations and other institutions to align international norms and values, particularly around human rights, with those of China. It is a world radically different from that of today. The international community needs to understand and respond to the great risks, as well as the potential rewards, of a world rebuilt by China.

The Israel/Palestine Reader

ALAN DOWTY

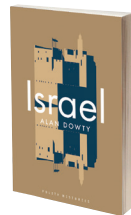

University of Notre Dame

"When most Arabs and Jews, Palestinians and Israelis are separated by physical and psychological borders, power asymmetries, and exclusive national narratives, Alan Dowty brings balance and perspective through a set of 50 key readings from both sides of the divide. A valuable resource."

Saliba Sarsar, Monmouth University

The first-hand narratives brought together in this Reader bring the Israel/Palestine conflict to life as seen by those closest to it.

229 x 152mm | 256 pages | 2018
HB | 978-1-5095-2733-5 | £60.00 | \$74.95 | €73.90

China Goes Green

Coercive Environmentalism for a Troubled Planet

YIFEI LI AND JUDITH SHAPIRO

NYU Shanghai; American University

"China Goes Green brilliantly redefines our understanding of modern Chinese governance, dismantling a simplified portrait and illuminating the force, and the flaws, of the centralized approach that some officials call the 'era of coercion.' These insights are vital to understanding not only China's environmental policy but also its handling of public-health emergencies and other issues of urgent global interest."

Evan Osnos, author of Age of Ambition: Chasing Fortune, Truth and Faith in the New China

What does it mean for the future of the planet when one of the world's most durable authoritarian governance systems pursues "ecological civilization"? Given the limited time that remains to mitigate climate change, we need to consider whether China's coercive environmentalism can show us the way. This book explores both its promises and risks.

Israel/Palestine

Fourth Edition

ALAN DOWTY

University of Notre Dame

"Alan Dowty's book now receives pride of place at the top of my list of concise, illuminating histories to recommend."

Paul L. Scham, University of Maryland and Middle East Journal

The fourth edition of Alan Dowty's leading introduction to the Arab-Israeli conflict demystifies the conflict by putting it in broad historical perspective, identifying its roots, and tracing its evolution up to and including recent developments, such as the clashes in the Gaza Strip and diplomatic initiatives.
